

Dermatopathology Corner

1. Overall Goal: To provide readers clinically relevant information that pertains to the histopathologic and/or cytologic diagnosis of skin diseases in a case-based manner.
2. The cases will be solicited from dermatopathologists by the Editors and readership.
3. Manuscripts will undergo standard review by the dermatopathology editor and one solicited reviewer.

Word length is restricted to 1,500

References: General dermatopathology texts and review articles should not be used as references. The text must cite original scientific work.

Abstract: Not applicable
